## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by *Microsoft Excel 97* (hereinafter referred as Excel 97), Microsoft Corporation, 1997, pages 1-11.

Regarding independent claim 1, Excel 97 discloses (on page 1):

- the cross tabulation in which the data analyzed is summed up (the sum of East row, West row, North row, South row, and the sum of January column, February column, March column and Total column);
- the cells selected among the cells to constitute the cross tabulation (the cells in each row or each column);
- the graph for displaying the data selected within the range, here the range is from A1 to D4.

Art Unit: 2776

Regarding claim 2, which is dependent on claim 1, Excel 97 discloses the selected range of data that is used to draw the corresponding graph (page 2).

Regarding claim 3, which is dependent on claim 2, Excel 97 discloses the cross tabulation to cross sum the data by:

- selecting of cells in the row East, selecting the AutoSum icon to sum up the numbers in the cells of the East row (page 3), and repeating for rows West, North and South;
- selecting of cells in the column January, selecting of the AutoSum to sum up the numbers in the cells of the January column (page 4), and repeating for columns February, March, and Total.

Regarding claims 4 and 5, Excel 97 discloses the rearranging of data according to a predetermined condition as "sort descending" by selecting the range A2 to D5 and selecting the Sort Descending icon. The data changed in the descending order (sequence East-West-North-South now changes to West-South-North-East ) is summed up in the cross tabulation (pages 5 and 6).

Regarding claims 6 and 7, Excel 97 discloses the graph for the range selected from A1 to D4 (page 7 and the first graph in page 8). When selecting the new item South, the graph displayed is added the data for South (page 8, the second graph).

Art Unit: 2776

Regarding claim 8, the data analyzed is a collection of a number of data items (page 9, the highlighted data).

Regarding claim 9, Excel 97 discloses the selecting of extracted random data so that the graph is displayed based on the extracted data (page 9, the Chart Wizard window).

Regarding claims 10-11, Excel 97 discloses the graph of extracted data in which data item displayed as an axis based on the data record (page 11; page 10; page 8, the first graph).

Claims 12-22 are mediums for the apparatus of claims 1-11, and therefore are rejected under the same rationale.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
